Relevant Experience

Intermediate Front-end Developer, Kellton

April 2022 — August 2023

- Developed and implemented intuitive user interface designs for Bestegg's financial products website, resulting in a 30% increase in user engagement metrics
- Collaborated with cross-functional teams, including designers and project managers, to successfully transform creative concepts into production realities for clients and stakeholders, resulting in increased client satisfaction ratings
- Conducted thorough code reviews with cross-functional teams, and learned and adapted from peer review of your own code.
- Collaborated with senior engineers and DevOps team to streamline bi-weekly production releases and implemented post-release monitoring protocols ensuring deployment without any major issues
- Utilized Storybook and Vitest frameworks to conduct comprehensive testing of components, ensuring 100% cross-browser compatibility and mobile responsiveness across all major browsers.
- Utilized agile development methodologies to successfully deliver 98% of project milestones on time and within budget for Bestegg, ensuring high client satisfaction and repeat business opportunities.

Web Development Support Specialist, SkipTheDishes

May 2020 — March 2022

- Maintained, updated, and implemented changes to the internal operations website. This included regularly monitoring and resolving website issues promptly, maintaining an uptime rate of 99.9%
- Managed a high volume of daily escalations and website feedback, collaborating with the development team to file bug reports, implement solutions and add user-friendly features on the platform based on employee feedback.
- Prioritized bug fix requests based on severity and impact and resolved 95% of bug fix requests with first-contact resolution
- Delivered technical support and provided coaching to the internal team on our internal platform

Skills

Programming Languages

JavaScript, TypeScript, HTML, CSS, Python, SQL

Libraries & Frameworks

React, Next.js, Vue.js, Redux, Pinia, Tailwind, SCSS, Django, Vitest, Jest, PostgreSQL

Tools & Platforms

Git, GitHub, Netlify, Vercel, Docker, API Protocols, Webpack, Firebase, Storybook, Figma, Jira

Personal Projects

Personal Website (V1)

My first personal website showcasing my interests, achievements, and journey. Built with care and passion. Powered by Next.js

Flightnest

Web app for tracking flights in real-time using the Skyscanner API. Search for flights by city, airport, or IATA airport code. User account creation and authentication are managed by Firebase. Bookmark and compare flight prices and schedules.

Open Weather

Simple weather web app built using the OpenWeather Map API and the built-in JavaScript Geolocation API.

Education
