## Relevant Experience

Intermediate Front-end Developer, **Kellton** April 2022 — August 2023

- Deliver high-quality, robust production code for a major client, **Bestegg**, a financial products company focused on providing people with a path to financial progress
- Collaborate with designers, project managers, and other engineers to transform creative concepts into production realities for clients and stakeholders
- Participate actively in code reviews, providing constructive feedback and suggestions to ensure adherence to coding standards and best practices
- Collaborate with the senior engineers and DevOps team in the preparation and execution of bi-weekly production releases, including testing, deployment, and post-release monitoring, to guarantee smooth and successful deployment
- Test and verify components' functionality using Storybook and Vitest frameworks to ensure cross-browser compatibility and mobile responsiveness
- Track and document user behaviour, demographic and audience segmentation, and engagement metrics for data-driven decision-making and improved user experience.

Web Development Support Specialist, **SkipTheDishes** May 2020 — March 2022

- Maintain, update, and implement changes to the internal operations website. This included regularly monitoring the website for any issues and ensuring the internal operations website remains operational
- Handle daily escalations, and website feedback, and work with development to file bug reports, correct bugs and add new features to the platform.
- Properly prioritize bug fix requests and provide the most appropriate and effective solutions available
- Deliver technical support and provide coaching to the internal team on our internal platform

## Skills

### Programming Languages

JavaScript, TypeScript, HTML, CSS, Python, SQL

### Libraries & Frameworks

React, Next.js, Vue.js, Redux, Pinia, Tailwind, Django, Vitest

### Tools & Platforms

Git, GitHub, Netlify, Vercel, Docker, Webpack, Firebase, Storybook, Figma

## Personal Projects

### **Personal Website (V1)**

My first personal website showcasing my interests, achievements, and journey. Built with care and passion. Powered by Next.js

### **Flightnest**

Web app for tracking flights in real-time using the [Skyscanner API](#). Search for flights by city, airport, or IATA airport code. User account creation and authentication are managed by Firebase. Bookmark and compare flight prices and schedules.

### **Open Weather**

Simple weather web app built using the [OpenWeather Map API](#) and the built-in JavaScript Geolocation API.

## Education

### **University of Manitoba**

Bachelor of Science in Physics & Astronomy & Computer Science Minors.

## Interests

Sports, Fitness, Video games, Music
